

## BMR-6 Waste Liner Rewinder

**BMR-6**  
Product Detail

**BOTTLEMATE-910P-2**

The BMR-6 is an optional factory-installed Rewinder for all 900 and 1500 series BOTTLEMATES. The BMR-6 is mounted on a rod at the top of the machine and automatically rewinds the waste liner that is produced as labels are applied to containers. Without the BMR-6, the waste liner will simply fall over the back of the machine and onto the floor.
